Dear Parent,

Welcome to Northeast Pediatrics and Adolescent Medicine! It is our pleasure to welcome you and your family to our office and thank you for choosing us to care for your children. Since 1964, we have been providing our patients with the quality and service that they deserve and expect.

We have two locations in Ithaca to better serve you. All of our Pediatricians, Nurse Practitioners, and Physician Assistants see patients at both locations.

Enclosed you will find our practice brochure that contains information on our physicians and nurse practitioners that will help familiarize you with the practice and how we operate. If you have any questions after reading the material, we will be happy to answer them for you by telephone prior to your visit.

Enclosed please find important forms that should be completed prior to the first appointment. There is also a record release enclosed; please complete this form and send it to your previous physician. We prefer to receive your child's records prior to your appointment. If we do not have the records, it may be necessary to reschedule a follow up appointment to provide your child with necessary vaccinations or treatments. Please note that you must bring your insurance card to your first and each subsequent visit.

We appreciate you selecting Northeast Pediatrics & Adolescent Medicine for your medical care and will work hard to serve your needs.

Sincerely,

Lori Jacobs  
Intake Coordinator
